

NCMPMS Timeline

The National Coastal Management Performance Measurement System (NCMPMS) will be implemented on a 3-phase schedule. Phase 1 will have two reporting cycles to enable OCRM to report results to Congress and OMB during the 2006 federal fiscal year. Programs are asked to report NCMPMS data based on the following grant years:

NCMPMS Phases	Grant Year Reported
Phase 1a: Public Access and Government Coordination	2004
Phase 1b: Public Access and Government Coordination	2005
Phase 2: Habitat and Water Quality	2006
Phase 3: Coastal Hazards and Community Development & Coastal Dependent Uses	2007

OCRM understands that there may be some indicators within the Public Access or Government Coordination categories for which programs are not able to report results for the 2004 grant year. Programs are only asked to report 2004 data that is readily available.

Programs will report NCMPMS data on the same schedule as award progress reports. A NCMPMS database and reporting system is being developed by OCRM and is expected to be available by the deadline for Phase 1a reporting. Programs are asked to include a NCMPMS task in each award application during implementation and to report progress on developing data collection processes in each semi-annual progress report. Programs are welcome to begin establishing data collection processes and reporting for additional NCMPMS categories throughout the implementation process, in addition to meeting the scheduled deadlines. Attached is detailed information on mileposts and reporting deadlines.
